

REMARKS

In the subject Office Communication, the Examiner states that the previous Sequence Listing did not comply with the requirements of Sections 1.821-1.825 for the stated reason that "SEQ IDs 7-12 are not homo sapiens sequences or variants of homo sapien sequences, but represent artificial sequences which are consensus sequences between different proteins."

Accordingly, in response, Applicants submit herewith a substitute paper copy and computer readable copy of the Sequence Listing that corrects the defect noted. Also, enclosed is a statement that the contents of the paper copy and the computer readable copy of the Sequence Listing are the same as required by 37 C.F.R. § 1.821(f). A copy of the Notice to Comply with Requirements for Patent Applications Containing Nucleotide and/or Amino Acid Sequence Disclosures is also enclosed. *No new matter has been added to the substitute Sequence Listing*

CONCLUSION

In view of the above amendments and remarks set forth above, it is respectfully submitted that this application is in condition for allowance.
